

# KALAELOA TRAFFIC UPDATE

October 7, 2021

## Kamokila Boulevard construction and contraflow postponed.

Hunt Companies Hawai'i has postponed planned road construction at the Kamokila Blvd. and FDR Ave. intersection. It was determined that previous contraflow patterns on Kamokila Blvd. should be reevaluated to make driving conditions safer for those who traverse the area. Our top priorities have always been to ensure the safety of drivers, pedestrians, and construction crews. Hunt's construction team will continue to work with the community to minimize traffic impacts and develop an alternative traffic pattern to ensure the safety of the community. We appreciate your patience and kōkua.

### Construction Underway.

**FDR Ave.:** Safety barriers have been installed, and work is underway to widen FDR from two lanes to four. During construction, there is no pedestrian access along this stretch of FDR Ave. due to safety concerns. Please use caution when driving through the area.
